BILL NO. S-86-08-11

SPECIAL ORDINANCE NO. S-138-86

AN ORDINANCE approving Change Order No. 2, Maplecrest Road Extension, Resolution #6021-85, with Earth Construction Company, in connection with the Board of Public Works and Safety of the City of Fort Wayne, Indiana.

NOW, THEREFORE BE IT ORDAINED BY THE COMMON COUNCIL OF THE CITY OF FORT WAYNE, INDIANA:

SECTION 1. That Change Order No. 2, Maplecrest Road Extension for Resolution #6021-85, with Earth Construction Company, in connection with the Board of Public Works and Safety, for:

> This Change Order is necessary because when the soil tests were run in the design state of the project, the C.B.R.'s were 6 with moisture content 12% to 14%. As a result of an extremely wet fall and spring and the installation of a large storm sewer truck line that resulted in cutting numerous farm field files, the moisture content has increased to 18% and above, thus losing the stability in the soil; so therefore, the recommended solution is to install subsurface drains to remove the moisture from the subsoil. To deal with the top portion of subgrade, we have to excavate 7 inches of soil, then place the geotechnical fabric which will help stabilize the soil. Then to build stability in our soil, we are planning to place 10 inches of #73 stone;

involving a net increase of Fifty-Nine Thousand Nine Hundred Twenty-Six and 25/100 Dollars ($59,926.25), all as more particularly set forth in the specifications, and which is on file with the Office of the Board of Public Works and Safety and is by reference incorporated herein, made a part hereof, and is hereby in all things ratified, confirmed and approved.

SECTION 2. That this Ordinance shall be in full force and effect from and after its passage and any and all necessary approval by the Mayor.

REQUEST AND JUSTIFICATION FOR CHANGE

1. Necessity for change: When the soil tests were run in the design stage of the project, the C.B.R.'s were 6 with moisture content 12% to 14%. As a result of an extremely wet fall and spring and the installation of a large storm sewer trunk line that resulted in cutting numerous farm field files, the moisture content has increased to 18% and above thus losing the stability in the soil; so therefore, our recommended solution is to install subsurface drains to remove the moisture from the subsoil. To deal with the top portion of subgrade, we have to excavate 7 inches of soil, then place the geotechnical fabric which will help stabilize the soil. Then to build stability in our soil, we are planning to place 10 inches of #73 stone.

2. Will proposed change alter size of the project? Yes _____ No X

If yes, explain: _____

3. Affect on operation and maintenance cost of this project: By draining the subsoil, we add stability to the base of the pavement which will add years of life to the pavement thus a good investment for the City. Without the stone, the project couldn't be built. At present, we can't even get the construction equipment through Maplecrest Road.
